2013 Forsyth County Annual Summary Report

Introduction

The three-pronged purpose of the North Carolina Child Fatality Prevention System is to promote understanding of the causes of child deaths, to identify system issues in the public agencies' service delivery to children and their family, and to assess, recommend, and implement systems for change to prevent future child deaths while also supporting a safe and healthy development of children.¹ The three-tier child fatality prevention system consists of the Child Fatality Task Force, State Child Fatality Prevention Team, and Local Child Fatality Prevention Teams.

Local Child Fatality Prevention Teams began in 1995, with the purpose of reviewing child fatalities and searching for ways to prevent child deaths. Deaths of children under the age of 18 years are reviewed in each of the 100 counties. Team members consist of appointed members from various agencies such as health department, department of social services, police and law enforcement, district attorney's office, guardian ad litem programs, local school system, medical examiner's office, fire department, and other child advocacy organizations. By reviewing child fatalities, local prevention teams²:

- Identify the causes of child fatalities
- Identify ways to improve the delivery of services to children and families, and
- Make and carry out recommendations for changes that could prevent future child fatalities.

Forsyth County

The goals of the Forsyth County Child Fatality Prevention Team/Community Child Protection Team (CFPT/CCPT) are to reduce fatalities by systematic, multidisciplinary, and multi-agency review of each child death in the county, to provide data-driven recommendations for legislative and public policy initiatives, and to promote interdisciplinary training and community-based prevention education.

The CFPT is required to review the medical examiner reports, death transcripts, police reports and other records of deceased county residents under the age of 18 in order to identify deficiencies in the delivery of services to children and families by public agencies, make and carry out recommendations for changes that will prevent future child deaths, and promote the understanding of the causes of child deaths. The operating procedures for the CFPT are provided by North Carolina General Statutes (NC GS) 143-571 through 143-578 to allow for the establishment of the CFPT and in accordance with the NC Administrative Code as approved by the NC Health Services Commission.

The intent of the CCPT is to enhance child protection in the community through collaboration and advocacy. The team is required to review selected active cases of child abuse/neglect and cases in which a child died as a result of suspected abuse/neglect. The purpose of these reviews is to assist the local Department of Social Services in identifying deficiencies and gaps in resources and developing strategic plans to address the conditions that compromise the safety and well-being of children. The duties and responsibilities of the team were adopted as North Carolina Administrative Code 41 |.0400. The original purpose and composition of the team was further formalized and expanded by GS 7B 1406, effective July 1, 1993. The Forsyth County Child Fatality Prevention Team and Community Child Protection Team continue to meet as one entity. Membership is in accordance with GS 143-576.2 established membership rules.

2013 Forsyth County Annual Summary Report

Meetings

The Forsyth County (FCCFPT/CCPT meetings are held on the third Wednesday of each quarter at 8:15 AM in the boardroom of the FC Department of Public Health and convened by the FC CFPT/CCPT Chair, Mr. Marlon Hunter.

The CFPT/CCPT Subcommittee reviews all deaths (from the same quarter of the previous year) from the FC Child Fatality Listing received quarterly from the NC State Program Coordinator of Local Child Fatality Prevention Teams. They select and recommend cases to be further reviewed by the Full Team at a later date. All CFPT/CCPT members bring office records and summaries of selected cases to the Full Team meeting. During the review, members identify system problems, recommendations and actions to prevent future child deaths.

2011-2014 Forsyth CFPT/CCPT Members

CFPT Representative	Name	Organization/Professional Title
DSS Director	Joe Raymond	FC Dept. of Social Services Social Services Director
DSS Staff Member	Linda D. Alexander	FC Dept. of Social Services Social Work Program Manager
DSS Staff Member Proxy	Kimberly D. Nesbitt	FC Dept. of Social Services Social Work Program Manager
DSS Board Member (Appointed by Chair of DSS Board)	David Plyler	FC Board of Commissioners DSS Board Member
Law Enforcement Officer (Appointed by County Commissioners)	Brad Stanley	FC Sheriff's Dept. Media Liaison Officer
Additional Law Enforcement Officer	Sandy MgGee	Kernersville Police Dept. Detective
District Court Judge (Appointed by Chief District Judge)	Lawrence Fine	District (21) Court Judge
Attorney from the DA Office (Appointed by District Attorney)	Kia Chavious	Assistant District Attorney Hall of Justice
Executive Director of a Community Action Agency	George M. Bryan	Former President/CEO The Children's Home
Local School Superintendent	Andrea Taylor	Social Worker Winston-Salem/Forsyth County Schools
Local School Superintendent Proxy	Linda Poller	Social Worker Winston-Salem/Forsyth County Schools
Mental Health Professional (Appointed by Director of Area MH Authority)	Jeffery B. Eads	CenterPoint Human Services
Guardian ad Litem Coordinator	Linda Devine	Guardian ad Litem
Health Director	Marlon Hunter	FC Dept. of Public Health Health Director
Health Care Provider (Appointed by the Board of Health)	Wayne Franklin, MD	Forsyth Medical Center Pediatrician
Emergency Medical Services Provider (Appointed by County Commissioners)	Rodney L. Overman	FC EMS EMS Compliance Officer
Representative of a Local Day Care Facility (Appointed by DSS Director)	Andy Hewitt	A Child's World Learning Center Director of the Childcare Facility
County Medical Examiner (Appointed by Chief Medical Examiner)	Jerri L. McLemore, MD	WFU Baptist Medical Center Forsyth County Medical Examiner

2013 Forsyth County Annual Summary Report

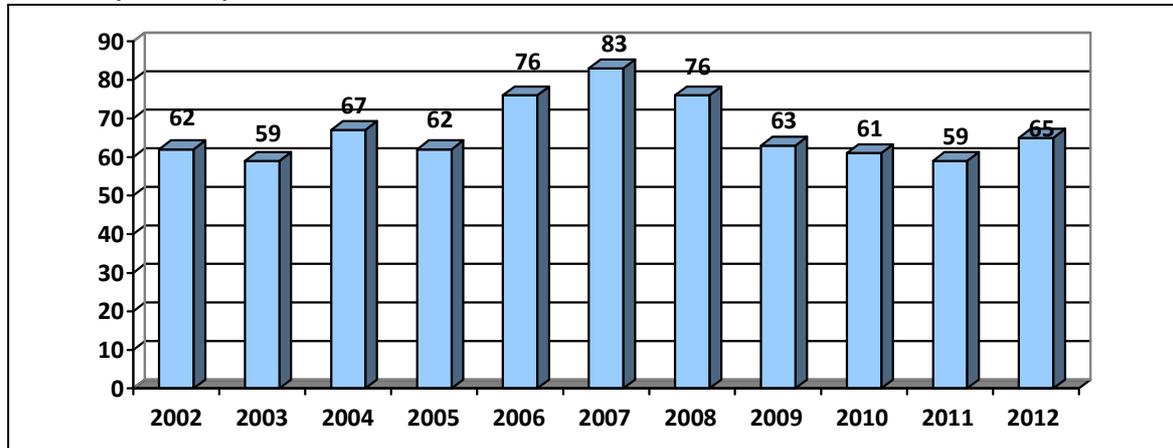

Parent of a Child Who Died Prior to 18 th Birthday (Appointed by County Commissioners)	Diane Ferrelli	Parent
County Commissioner Appointee	John Tesh	Winston-Salem Police Department WSPD CID Detective
County Commissioner Appointee	Meggan Goodpasture, MD	WFU Baptist Medical Center Pediatrician
County Commissioner Appointee	Pattie Sacrinty	FC Dept. of Public Health School Nursing Supervisor
County Commissioner Appointee	Robert S. Owens	Assistant Fire Chief Winston-Salem Fire Department
County Commissioner Appointee	Dolores Hill	Financial Pathways of Piedmont
FCDPH Staff	Carrie Worsley	FC Dept. of Public Health Coordinator of Health Services
FCDPH Staff	Lovette Miller	FC Dept of Public Health Research Assistant
CFPT Coordinator	Ayotunde Ademoyero	FC Dept. of Public Health Director Epidemiology & Surveillance

Forsyth County Child Fatality Prevention Team Reviews

In 2013, the CFPT Subcommittee reviewed 65 child deaths that occurred in 2012. In the past 10 years, the number of child fatalities peaked in 2007 with a total of 83 cases and has gradually decreased as shown below.

Figure 1: Forsyth County Child Fatalities, 2002-2012

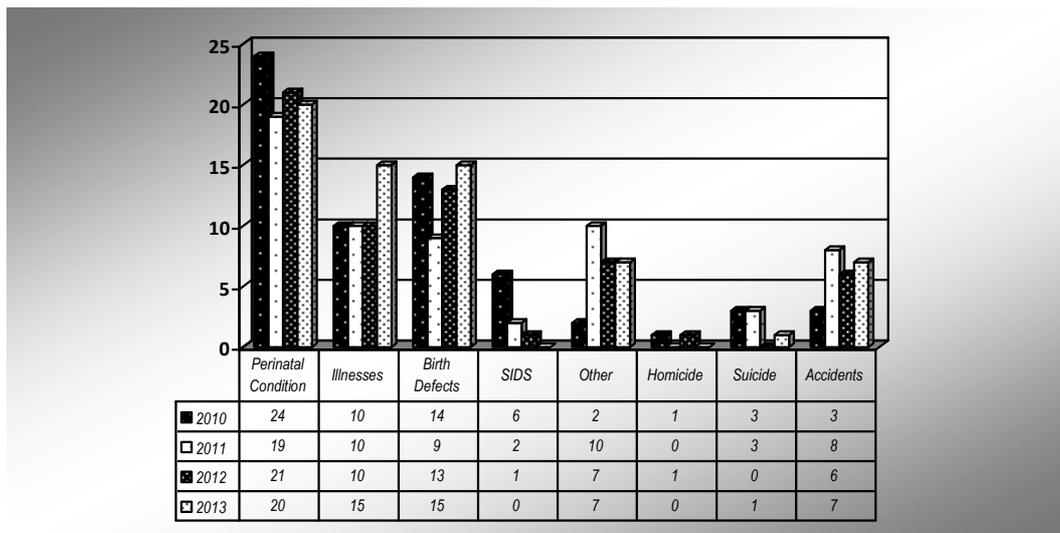

2013 Forsyth County Annual Summary Report

Forsyth County Child Fatality Statistical Information

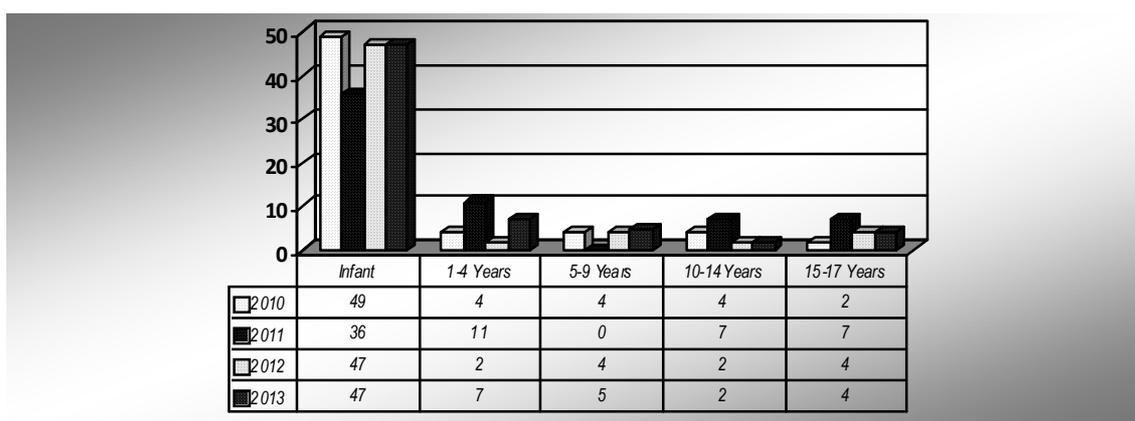

A total of 65 cases were received from the state for review in 2013. Each of these deaths was initially reviewed by the CFPT/CCPT subcommittee and 20 were submitted for further examination by the Full Team. The charts below describe the cause of death, sex, race/ethnicity, and age groups of these cases.

Figure 2: Review Cases by Cause of Death- 2010-2013

In 2013, forty-two (65%) of these reviewed cases were due to birth defects, other birth-related conditions (prematurity, perinatal cases, and child death due to unsafe sleeping environments). Twenty-three (35%) were due to accidents, suicide and illnesses.

Figure 3: Review Cases by Age Group

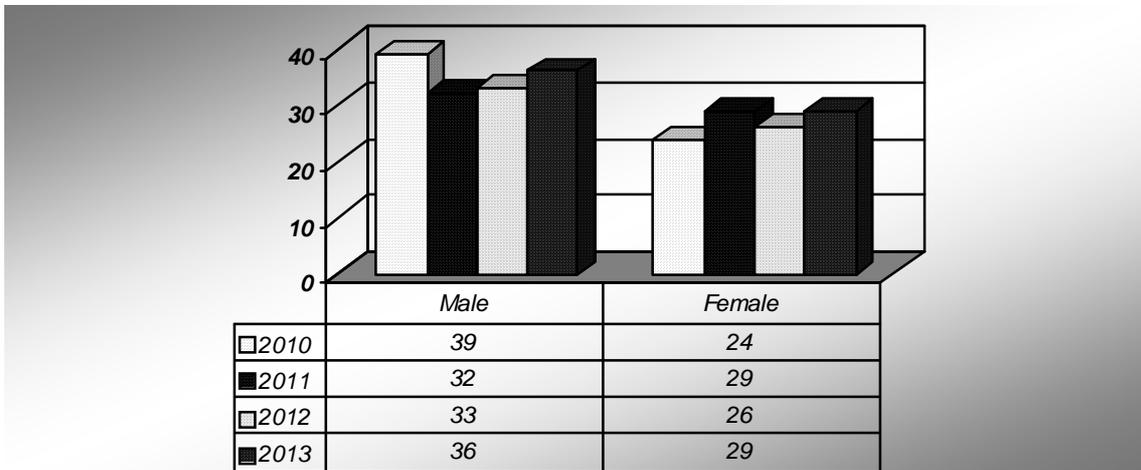

In 2013, forty-seven (72%) of reviewed cases were in infants under the age of 1 year. Seven (11%) were ages 1-4 years, five (8%) were ages 5-9 years, two (3%) were ages 10-14 years, and four (6%) were ages 15-17 years.

2013 Forsyth County Annual Summary Report

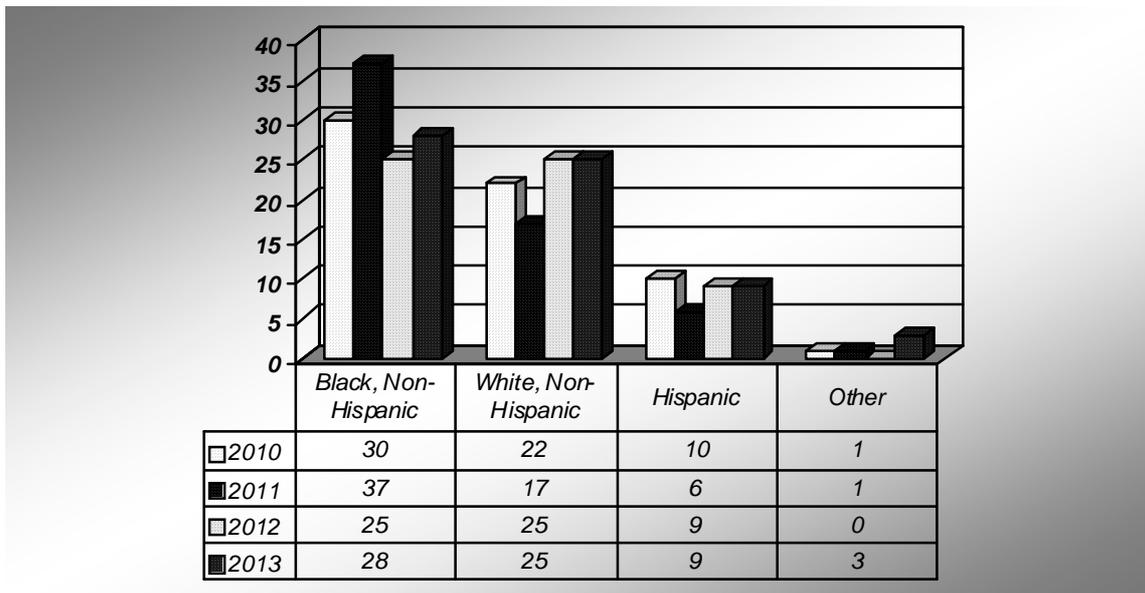

Figure 4: Review Cases by Gender

In 2013, thirty-six of reviewed cases (55%) were males and twenty-nine (45%) were females.

Figure 5: Review Cases by Race/Ethnicity

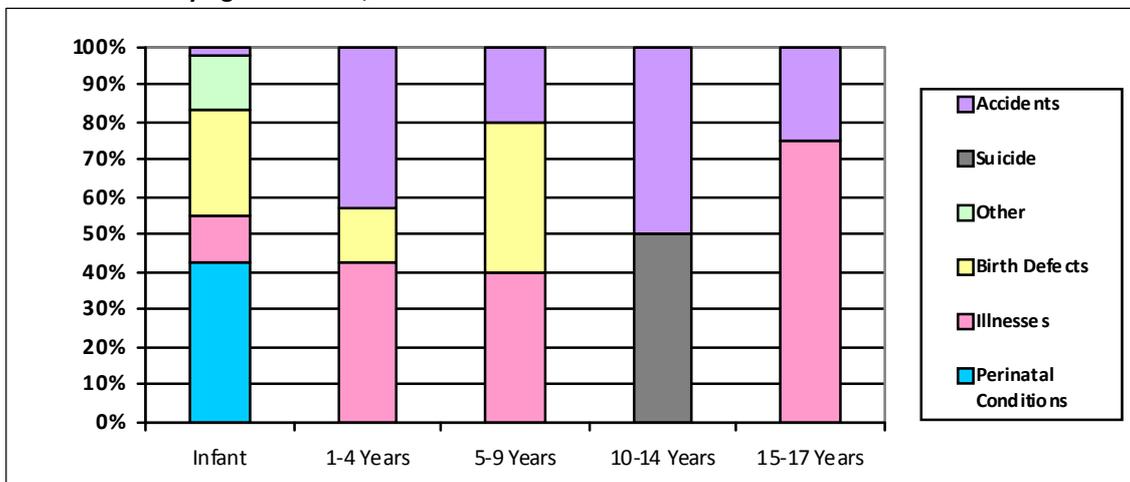

In 2013, twenty-eight (43%) of reviewed cases were black, non-Hispanic; twenty-five (38%) were white, non-Hispanic, other race were three (5%) and nine (14%) were Hispanic.

2013 Forsyth County Annual Summary Report

Figure 6: Child Deaths by Age & Manner, 2013

Manner of death can be considered the determination that an act was intentional or that person had the knowledge that an act can or will result in death. There are five accepted manners of death:

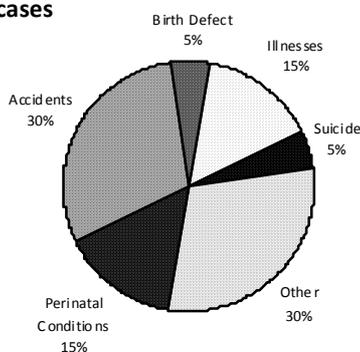

- Accident: death was not an intended and/or unknown consequence of an act
- Homicide: death was a result of an intentionally inflicted injury
- Suicide: death resulting from intentional self-harm
- Natural: identified disease or illness
- Undetermined: intentionality of injury was not clear or no cause could be identified that would lead to identification of manner

When examining the manner of death by age, the majority of infant deaths are determined to be *natural*. Among children ages 1-4 years accidents and illnesses accounted for 43% each and birth defects (12%). Among children ages 5-9 years illnesses and birth defects accounted for 40% each and 20% by accident. The cause of death for youth ages 10-14 years was split evenly between accidents (50%) and suicide (50%). Among the 15-17 years age group, illnesses accounted for 75% of the manner of death followed by accidents (25%).

Full Team Review Cases

Twenty cases that received further review were due to Accidents (30%), Other (30%), Perinatal Conditions (15%), Illnesses (15%), Birth Defects (5%) and Suicide (5%). Approximately 20% of those classified as Other and Accident were due to unsafe sleeping practices.

Figure 7: Full Team Review cases

2013 Forsyth County Annual Summary Report

System Issues Identified and Recommendations

The CFPT/CCPT identified system issues that may have played a role in these deaths and offered the following suggestions for preventing such deaths in the future:

Table 1: System Issues Identified and Recommendations

Cause of Death	Identified System Problem	Recommendation
Accidents(1)	Speeding	None
Accidents(1)	Improper Child Restraint	None
Accidents(1)	1. Priority on efficiency for funding for bus routes. 2. Prosecution-Statutes written in a way in which driver must see school bus on the front, back, and side of bus. That element of defense needs to be met. Efforts should be made to look into the statute and have it amended.	1. Civil penalty tacked onto vehicle for stop arm violations if possible. 2. Collaboration with DOT on stops (i.e. lighting, clearing trees that reduce visibility). 3. 100% of right side stops. 4. Parent education on bus stop safety. 5. More school education for students on pedestrian crossing and auto safety.
Accidents(1)	Unsafe sleeping practices; and/or Co-Sleeping DSS did not get notification of death.	Need for safer cribs. Ongoing Safe Sleep campaign on buses. Improve communication and collaboration among agencies: FC Child Death Protocol
Other (3)	Unsafe sleeping practices; and/or Co-Sleeping	Ongoing Safe Sleep campaign on buses.
Other (1)	Unsafe sleeping practices; and/or Co-Sleeping	Reclassify COD to Accidental suffocation. Ongoing Safe Sleep campaign on buses.
Other (1)	Unsafe sleeping practices; and/or Co-Sleeping DSS did not get notification of death.	Awareness opportunity that smoking increases SIDS risk. Pamphlets in mental health for managing child safety issues and habits. More effective presentation of information than brochures. Need to research on evidence-based models. Improve communication and collaboration among agencies: FC Child Death Protocol. Ongoing Safe Sleep campaign on buses.
Other (1)	1. Better collaboration between Forsyth and Guilford counties on SIDS messaging 2. Joint county messaging on regular pediatric visits beginning in the first days of life 3. The venue of child fatality review should be where the child died if that child had spent considerable time in that county	1. State OCME to include unsafe sleeping environment with undetermined cause of death 2. DSS: As Guilford County has done, nurses should go to home visits with DSS social worker. It would be beneficial to Forsyth County
Perinatal Conditions (1)	Prenatal Substance Abuse	None
Accidents (2)	No system problem identified	None
Birth Defect(1)	No system problem identified	None
Illness (1)	No system problem identified	More media coverage to inform community of pertussis and importance of vaccination. Letters were sent from the FCDPH to 6 th Graders' parents to get vaccination free at the health department.
Illness (2)	No system problem identified	None
Perinatal Conditions (2)	No system problem identified	None
Suicide(1)	No system problem identified	None

2013 Forsyth County Annual Summary Report

Infant Death and Additional Child Mortality Data

In Forsyth County, infant deaths made up 73% of all child deaths between 2008-2012. The following figures focus on infant death rates comparing North Carolina and Forsyth County rates.

Figure 8: Child Mortality 2000-2012

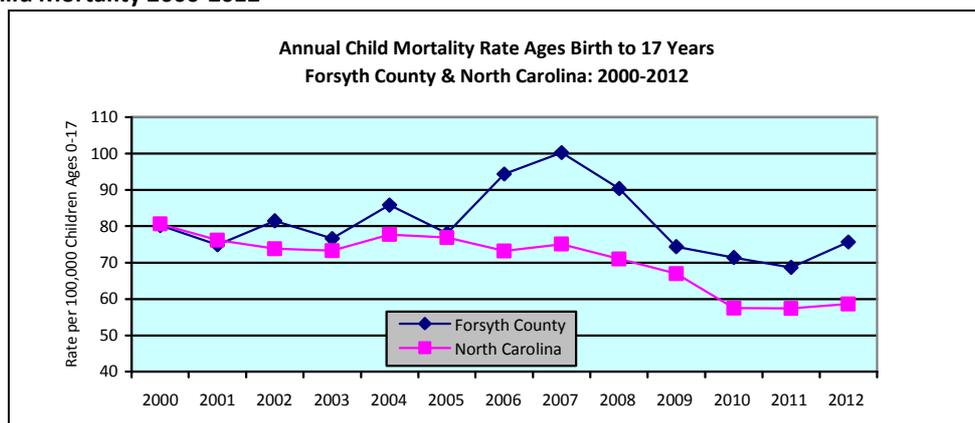

Figure 9: Infant Death Rates by Race in North Carolina & Forsyth County, 2008-2012

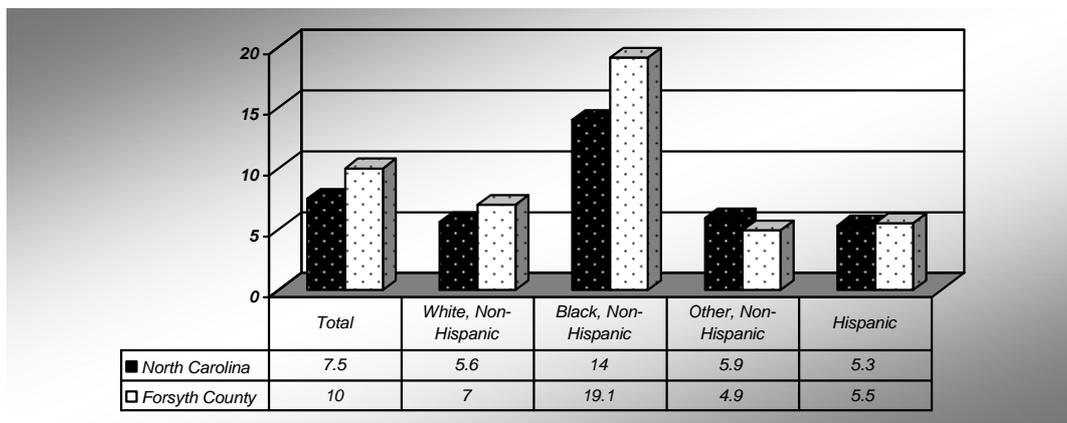

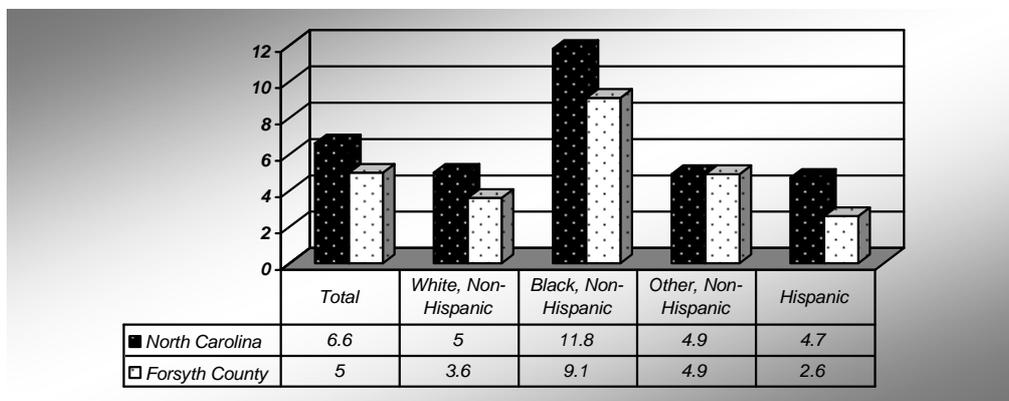

Figure 10: Fetal Death Rates in North Carolina & Forsyth County, 2008-2012

2013 Forsyth County Annual Summary Report

Figure 11: Neonatal (<28 days) Death Rates in North Carolina & Forsyth County, 2008-2012

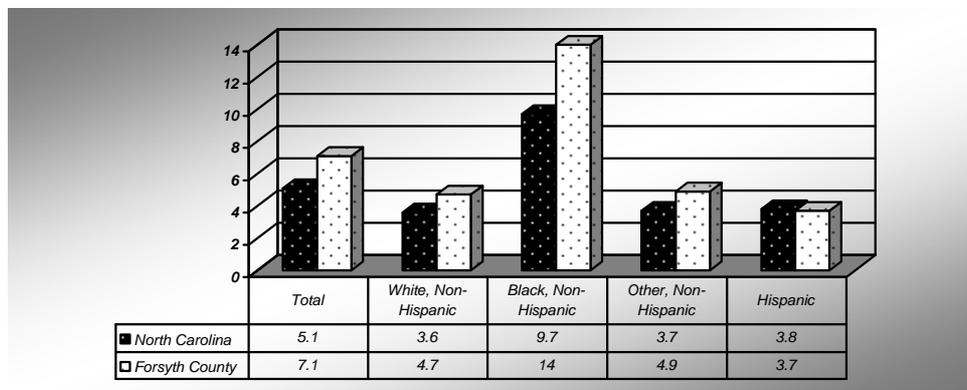

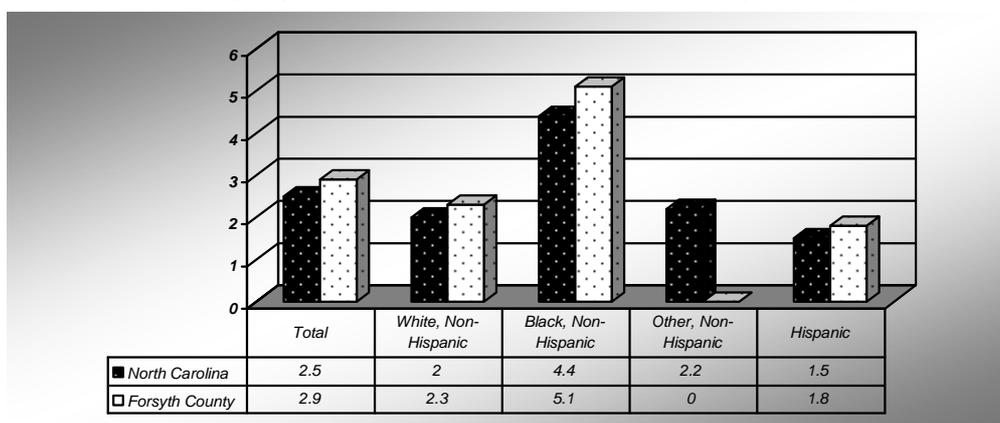

Figure 12: Post-Neonatal (28 days-1 year) Death Rates in North Carolina & Forsyth County, 2008-2012

Leading Causes of Death

Table 2: Ten Leading Causes of Death in Forsyth County, 2008-2012, Ages 0-19 Years

	Cause of Death	Number of Deaths	Death Rate
1	Conditions originating in the perinatal period	118	24.5
2	Congenital anomalies (birth defects)	63	13.1
3	Motor vehicle injuries	26	5.4
4	Other Unintentional injuries	24	5.0
5	SIDS	18	3.7
6	Suicide	14	2.9
7	Diseases of the heart	10	2.1
	Cancer - All Sites	10	2.1
9	Septicemia	7	1.5
10	Homicide	6	1.2
	Total Deaths (Top 10)	296	-
	Total Deaths (All Causes)	356	74.0

Table 2 details the top ten causes of death for youth ages 0-19 years old as compiled by the NC State Center for Health Statistics. The leading cause of death in Forsyth County were due to Conditions Originating in the Perinatal Period (33% of all causes of deaths), followed by Birth Defects (18%).

2013 Forsyth County Annual Summary Report

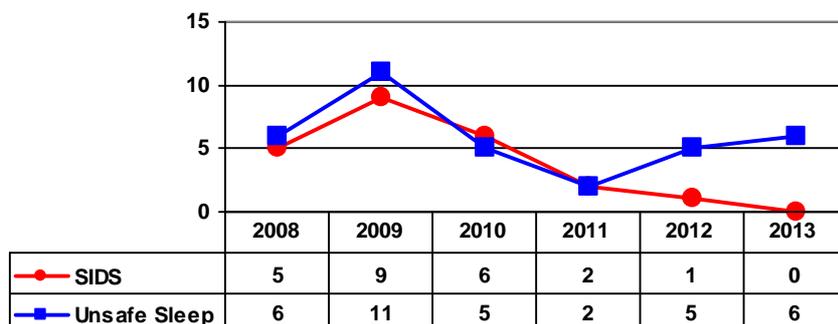

Sudden Infant Death Syndrome (SIDS) and Unsafe Sleep

A safe sleep media campaign began in 2011 due to the significant number of child deaths due to SIDS and unsafe sleep practices. Media ran on buses and interior posters inside buses. Also 30-second PSA “Safe Sleep in Forsyth County” was shown at local movie theater. It focused on the following “ABC” safe sleep practice guidelines for babies: **A-Along; on his or her Back; in a Crib or Bassinet.**

Figure 13: Safe Sleep Bus Ad

Figure 14: SIDS and Unsafe Sleep Related Deaths in Forsyth County, 2008-2013

Although the case review due to SIDS has decreased significantly, there has been a gradual increase in case reviews due to unsafe sleep practices. CFPT will continue the Safe Sleep media campaign on the Winston-Salem Transit Authority buses.

Conclusion

System issues were identified and recommendations made for majority of the cases reviewed by Forsyth County CFPT/CCPT. Knowledge of infant death rates, leading causes of death, service gaps and hospital discharges for children provides additional information on the state of child fatalities and injuries in Forsyth County. This will be used in providing direction in prevention and safety efforts to promote well-being of Forsyth County’s children.
