^{49 4-602.13} Nonfood Contact Surfaces-REPEAT-C: Cleaning is needed inside cabinets under the drink station. Nonfood-contact surfaces of equipment shall be cleaned at a frequency necessary to preclude accumulation of soil residues.

51 5-205.15 (B) Maintained in Good Repair-REPEAT-C: Leaks were observed in the following areas: faucet of the 3-compartment sink, vacuum breaker of the can wash, and the pipe at the wash vat of the 3-compartment sink. A plumbing system shall be maintained in good repair.

Additional Comments

The front handwashing sink is producing scolding hot water when both hot and cold faucets are turned on individually. After running continuously, the cold water runs at a temperatures sufficient enough to mix with hot water to ensure that employees are able to wash their hands for 20 seconds. Contact the plumber to adjust the water to prevent scold hazard and to ensure that the employees are capable of effectively washing their hands.
